AI
Services

IntelligIS is focused on helping businesses harness the full potential of artificial intelligence (AI). Our expertise lies in having a lifecycle approach that helps organizations wherever they are on their adoption journey – from discovery, to integration, to ongoing support.

And as a Microsoft Cloud Solutions Provider (CSP), we bring the power of Microsoft Copilot—a game-changing AI solution within Microsoft 365 that introduces a whole new way to work.

AI
Copilot Boosts Creativity and Productivity, Securely

Copilot works alongside the Microsoft 365 apps businesses use every day to reduce repetitive tasks, increase productivity and creativity – while giving peace of mind coming from Microsoft's commitment to security and responsible AI.

Responsible, Secure AI

Microsoft Cloud is AI you can trust.

Your data is your data – Microsoft safeguards it while you maintain control and access.

Your data never leaves its secure partition, and it is never used for training purposes.

Supercharged Productivity

Copilot unlocks valuable insights by analyzing data across your organization to help you stay on top of important tasks.

Keep Outlook Organized
Clear your inbox in minutes – get long messages summarized, suggested action items and replies

Stay Caught up with Teams
Quickly catch up on missed meetings, get suggested action items in real time with conversation summaries

Amplified Creativity

Use Copilot AI-generated content to inspire creativity, explore new ideas, and innovate across teams.

Generate Content in Seconds
Write, edit, and summarize content in Word, or transform written content into PowerPoint decks and presentations with a single command

Think Faster with Excel
Create powerful, professional visualizations, project trackers, and explore your data without modifying it

Foster New Ideas in Meetings
Turn ideas into designs and summarize whiteboard content, or gather ideas on specific topics to run more creative meetings
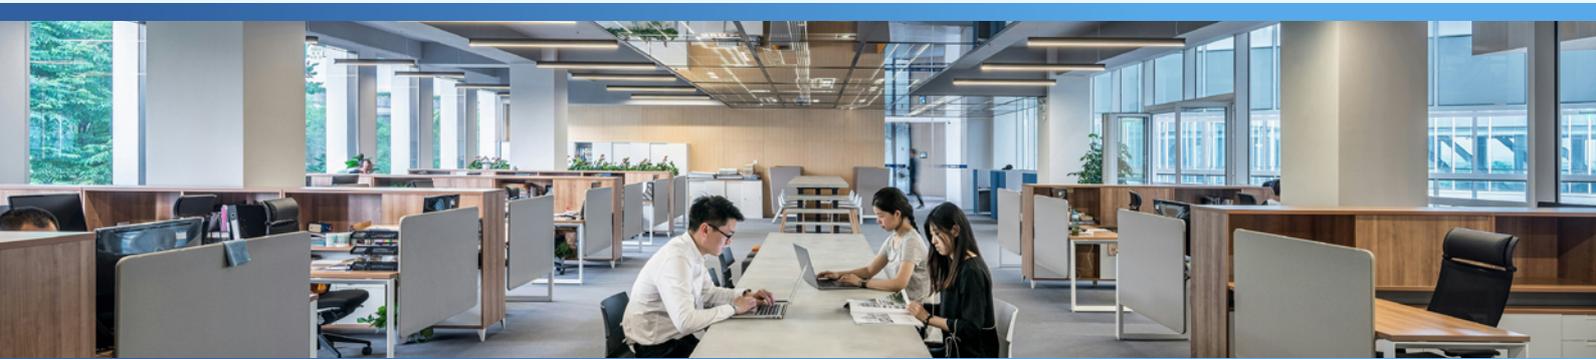

Tailored to Your Workflow

Customize Copilot to align with your business processes and unique requirements.

AI
How We Can Help Guide Your AI Journey

We help businesses along their entire AI lifecycle to help ensure successful adoption and transformation based on the client's goals.

With an end-to-end approach, we can support you with:

Advisory
Guide Transformation

- We help you envision AI's impact on your business
- Provide guidance on ethical and secure AI practices

Readiness
Prepare for Adoption

- Assess AI readiness with you and bridge gaps as needed
- Safeguard data during AI integration

Deployment
Bring AI to Life

- Develop proof of concept to test AI in real-world scenarios
- Implement AI successfully in the organization

Governance & Adoption
Ensure Success

- Define governance policies for AI usage
- Drive AI adoption across your organization

Extensibility
Tailor AI to Your Needs

- Customize Copilot to address specific business challenges

Ongoing Services
- **Training**
  Empower your team with AI knowledge
- **Support**
  Resolve issues promptly
- **Roadmap Development**
  Plan for AI expansion

Cloud
Managed Cloud Services

Digital transformation is here to stay. And as part of that, securely moving infrastructure and apps to the cloud has become critical.

However, it can often be hard to know where to start – cloud adoption can take many paths, and there are many considerations to ensure alignment to specific business goals.

Cloud
We Help You Maximize the Cloud

With our proven methodologies, we help simplify the process, reduce complexity, and guide businesses along their cloud transformation journey.

And as a Microsoft Cloud Service Provider (CSP), we leverage world class solutions to help businesses migrate to and maximize the cloud so they can scale, innovate, and increase productivity.

Accelerate Business Transformation
The cloud offers tremendous benefits for organizations, many which are realized immediately or shortly after migration.

Remove Legacy Constraints
Move away from inflexible, outdated on-premises systems that require maintenance and upkeep

Enable Hybrid Workers
Boost productivity, regardless of worker's location, with seamless collaboration tools

Reduce Capital Expenditures
Cloud solutions eliminates the need for expensive hardware upkeep – pay only for resources you need and use

Increase Data Resiliency
Protect and back up critical data securely in the cloud

Quickly Scale and Respond
Scale IT resources up or down quickly to meet business demands and customer needs
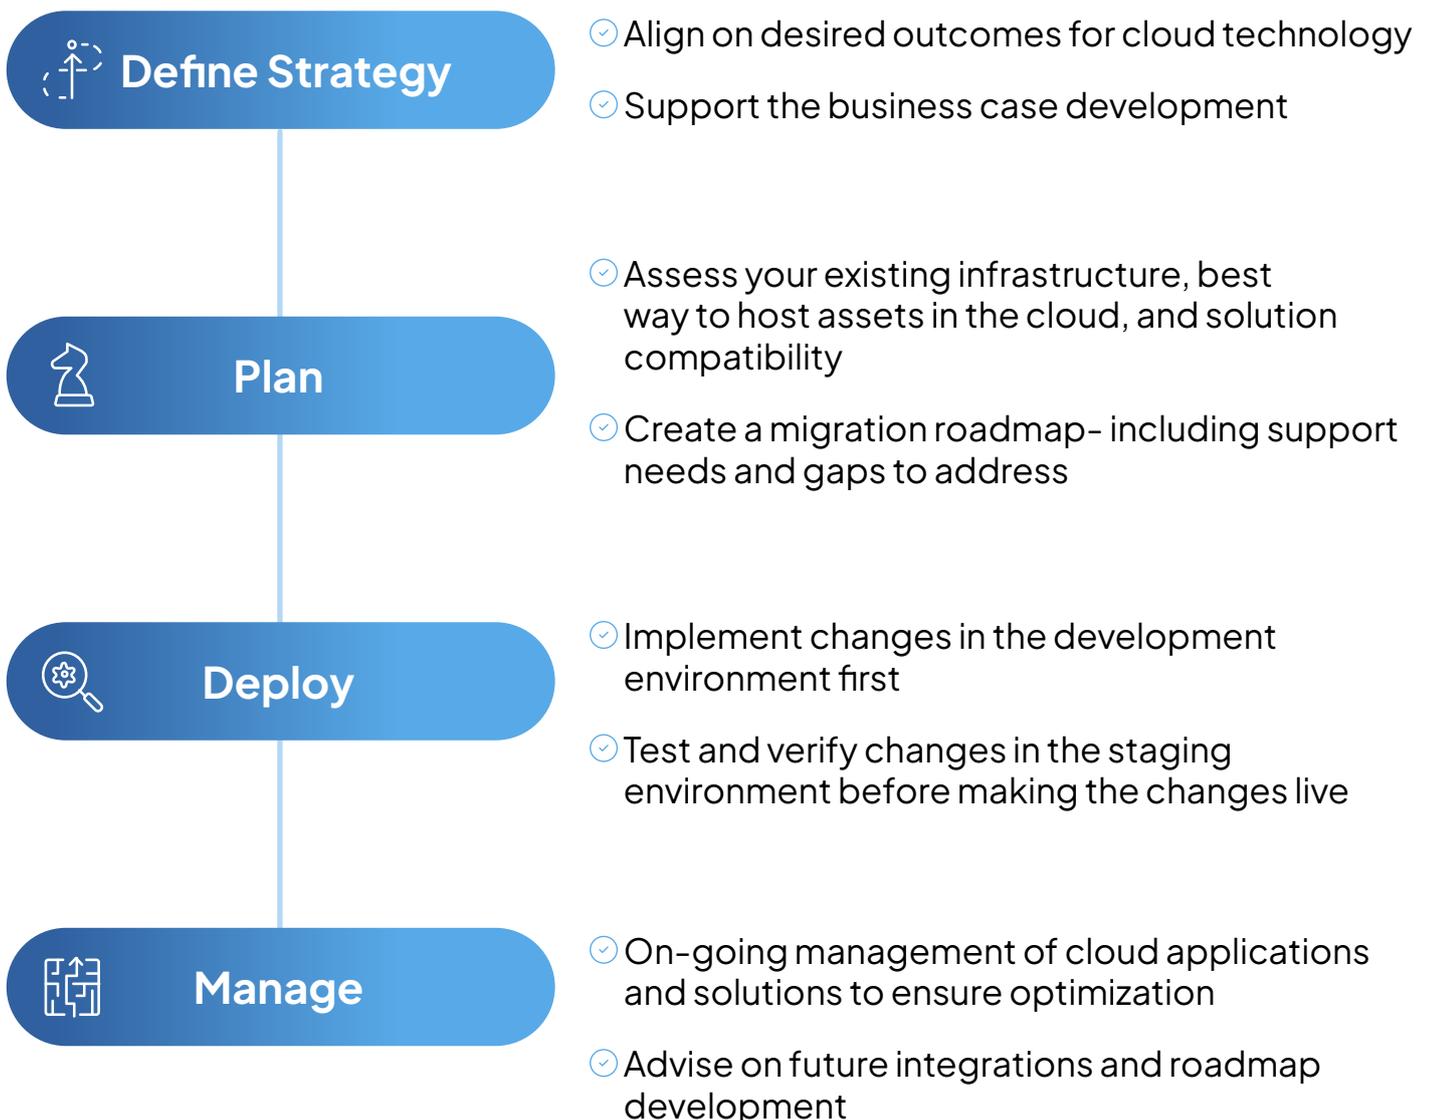

Enables Use of AI
One tremendous value of moving to the cloud is that it enables you to tap into the power of AI

Cloud
Benefit from Our End-to-End Cloud Expertise

We support you along the entire lifecycle of your cloud adoption journey – from migration to innovation:

Define Strategy
- Align on desired outcomes for cloud technology
- Support the business case development

Plan
- Assess your existing infrastructure, best way to host assets in the cloud, and solution compatibility
- Create a migration roadmap- including support needs and gaps to address

Deploy
- Implement changes in the development environment first
- Test and verify changes in the staging environment before making the changes live

Manage
- On-going management of cloud applications and solutions to ensure optimization
- Advise on future integrations and roadmap development

Cloud
Best in Class Solutions

We ensure the highest levels of security, reliability, and efficiency with Microsoft Cloud solutions

Microsoft Azure & Virtual Desktops

Shift workloads to the cloud and enable anytime, anywhere access to your desktop and applications

Microsoft Endpoint

Manage and monitor devices, desktop computers, virtual machines in the cloud and on-premise

Microsoft Teams

Enable collaboration and calling across the organization, regardless of user location

Cybersecurity

Cybersecurity is the foundation for any organization regardless of the technology used. We help clients develop an end-to-end strategy to protect their environment and continuously evaluate and evolve the approach to meet the demands of their business.

With client objectives in mind, we guide them through key stages

Governance
Establish the framework for managing cybersecurity in the organization

Risk Assessment
Implement a systematic process to identify, evaluate, and prioritize risks

Compliance
Ensure adherence to relevant laws, regulations, and industry standards

Cybersecurity

Governance:
Set the Foundation

We help clients develop:

Oversight
Determine stakeholders who manage governance decisions

Policies and Procedures
Define roles, responsibilities and acceptable behavior

Compliance Monitoring
Regular audits and assessments to ensure adherence

Risk Assessment:
Identify and Mitigate Risks

We guide clients through:

Risk Identification
Identify potential threats, vulnerabilities, and assets

Risk Analysis
Assess the impact and likelihood of each risk

Risk Mitigation Strategies
Implement approaches and controls to reduce risk

Continuous Monitoring
Regularly reassess and adjust risk management strategies

Compliance:
Meet Legal and Regulatory Obligations

We educate clients and follow the industry best practices on:

Data Privacy Laws
From GDPR, CCPA, and other protection laws

Industry-Specific Regulations
Tailor approach to specific sectors compliance requirements

Security Frameworks
Follow established frameworks to enhance security posture

Audits and Reporting
Regularly assess compliance, conduct audits, and maintain records

IT Services
What type of services do you need?

Whether project-based or ongoing support, we have extensive experience helping clients maximize the benefits of technology, while simplifying the complexities of integrating and managing it in their business.

Managed IT Services

For clients who need ongoing support of their IT environment, we offer proactive oversight that takes the burden of IT off their shoulders

Learn More →

Professional Services

For clients that need project-specific support, we have deep technical expertise that can be leveraged for advisory services, integration, and deployments

Learn More →

Managed IT Services

We align our managed services to the ITIL 4.0 framework which means we customize support and solutions based on our clients individual needs

We Offer:

Remote support

Our technical experts help clients, regardless of their location, resolve issues promptly so they can keep working.

Onsite support

We can dispatch a specialist onsite to resolve issues as needed – and for clients that want personalized support, we place a dedicated technical person onsite as part of their internal team.

Helpdesk

Our helpdesk responds to all client requests, classifying, prioritizing, and resolving them based on industry best practices.

Vendor management

We manage and work alongside vendors in our client's environment to create a seamless experience.

vCIO services

We maintain an ongoing relationship with clients that involves regular strategic business reviews to stay aligned to their goals and objectives.

Managed IT Services

What managed IT service clients can expect

Transparent billing

Agreements are simple, billed monthly per user – and no bills are sent to clients without their approval

Fast response times

SLAs govern our helpdesk so IT issues are resolved timely for clients

High touch approach

U.S-based technical support team allows us to respond quickly to client needs - whether remote or onsite

Proactive coverage

We continuously monitor your environment from end-to-end, so you don't have to

Professional Services

Our breadth of expertise allows us to help clients who want external support integrating new technology into their environment. From strategy to deployment, we guide organizations along the project lifecycle to ensure success.

Proven performance and expertise

We've logged countless project hours and become highly skilled in core areas:

On-premises to Cloud migrations

File Servers to Azure File Servers

File Servers to SharePoint Online

Vmware environments to Azure VMware Solution (AVS)

Email migrations to Exchange Online

Google Mail to Exchange Online On-premises

Exchange Servers to Exchange Online

### Workstation refreshes

Older Windows Versions to Windows 11

Hardware Refreshes

Network refreshes

Migrations from any vendor to Meraki

Migrations from any vendor to Cisco

Professional Services

What we deliver on client projects

On-demand expertise

Our technical team is ready whenever clients want to start migrations, deployments, or refreshes

Strategic advisory support

We consult and recommend solutions based on our client's goals, not specific products

Technical staff augmentation

We work alongside IT teams to get the project done – when complete, we handoff for the client's oversight or provide ongoing management if needed

End-user education

From workshops to demos and user manuals, we partner with clients to develop a plan that helps internal users leverage the new technology.

Let us help you transform your business using the power of technology.
